### **DETAILED ACTION**

1. This communication is responsive to your response filed 10/9/07. Claims 1-11 remain on the application unamended.

#### ***Claim Rejections - 35 USC § 102***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Boskamp et al. P.N. 6,995,561 (Boskamp). Boskamp discloses a multiple channel transceiver for MRI. Applicant's attention is directed to Fig.5 and corresponding description. Boskamp uses a circuit 200 to individually drive resonator elements or coil elements of a volume array 100. Each of the driving signals is controllable as to phase and amplitude. See col. 6, lines 50-64. Boskamp meets all the limitations of the claims at issue.

#### ***Response to Arguments***

4. Applicant's arguments filed 10/9/07 have been fully considered but they are not persuasive. Applicant argues that Boskamp does not disclose all elements of the claims at issue. The element not disclosed by Boskamp is allegedly the requirement by claim 1, that "the individual coil drive signals generated by the coil drive circuit so as to have substantially identical shape". The examiner disagrees that such feature is absent in Boskamp. First, because Boskamp is directed to a volume coil array for MRI it is clearly inherent that all drive signals would be of substantially the same shape, namely a pulse for generating or eliciting the MRI response from the body under examination. Secondly,

Careful examination of Boskamp's Fig. 5, shows that all element signals are commonly generated at amplifier 204, after this, the signal is attenuated, phase shifted, but the shape of the signal will not change.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
